DETAILED ACTION

This action is in response to the amendment and revocation of power of attorney received by fax 11/13/2003. Applicant has canceled claims 1-36 and added claims 37-102. The amendment will be entered even though claims 11-19, 24,27-29 had been previously canceled. The pending claims are claims 37-102. The cancellation of the pending claims has mooted the rejections of record.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 37-102 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no basis in the disclosure for he component (b) as now claimed, the oxidizing agent being tannic acid or sodium hydroxide. Applicant has not pointed to basis for this insertion and the examiner cannot find it in the specification. The entire specification is directed to an oxidizing agent being a peroxide. Applicant has provided 25 examples of the invention. All use hydrogen peroxide or sodium peroxide as the oxidizing agent. Regarding tannic acid, the examiner cannot find it disclosed in the originally filed specification. Regarding sodium hydroxide, page 6 line 21 states, "The oxygen source may include a hydroxide such as sodium hydroxide." The antecedent basis for "oxygen source" in that sentence

Art Unit: 1751

is "a peroxide" on line 20. In other words, the composition which has a peroxide as the oxygen source may further include sodium hydroxide. Sodium hydroxide is not the oxidizing agent. Applicant states in several places that the oxygen source is preferably a peroxide. See page 3 line 22, page 6 line 20, page 9 lines 18-20, page 13 lines 21-24, page 15 lines 18-19.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
